PROFESSIONAL SUMMARY

Final-year BSc Computer Science student at the University of Embu with a strong foundation in software engineering and a passion for building impactful technology solutions. Certified Software Engineer from PLP Africa (2025), with hands-on experience developing a live e-commerce platform (OrbitShop) and an AI-powered precision farming application. Eager to contribute technical skills and innovative thinking to Safaricom's engineering teams.

EDUCATION

Bachelor of Science in Computer Science | 2022-2026

University of Embu • Embu, Kenya

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Software Engineering, Computer Networks, Artificial Intelligence, Object-Oriented Programming

Software Engineering Certification | 2025

PLP Africa (Power Learn Project) • Kenya

Completed an intensive software engineering program covering full-stack web development, agile methodologies, and real-world project delivery.

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML5, CSS3, SQL

Backend: Node.js, Express.js, Django, REST APIs

AI/ML: Python (scikit-learn), Data Processing

Frontend: React.js, Tailwind CSS, Bootstrap

Databases: MySQL, PostgreSQL, MongoDB

Tools: Git, GitHub, VS Code, Postman, Linux

Other: E-commerce Systems, API Integration

PROJECTS

OrbitShop – E-Commerce Platform | 2025 – Present

Full-Stack Developer • orbitshop.co.ke

- Built a fully functional e-commerce platform serving real customers with product listings, cart management, and secure checkout.
- Developed a React.js frontend for a responsive and intuitive shopping experience.
- Implemented a Node.js/Express backend with RESTful APIs connected to a MongoDB database.
- Deployed and maintained the live production application at orbitshop.co.ke.

Precision Farming – AI Crop Prediction System | 2025 – 2026

Developer & ML Engineer • University Project

- Designed and built an AI-powered web application that recommends optimal crops based on user GPS location and soil type.

- Trained and integrated a machine learning model using Python (scikit-learn) for crop prediction logic.
- Built a user-facing interface allowing farmers to input soil data and receive actionable planting recommendations.
- Leveraged geolocation APIs to automatically detect the user's region and adjust recommendations accordingly.
- Demonstrated real-world impact by addressing food security challenges through technology.

CERTIFICATIONS & TRAINING

- **Software Engineering Certificate** – PLP Africa, 2025
- **BSc Computer Science (In Progress)** – University of Embu, Expected graduation 2026
- **Advanced React** – Coursera
- **Version control**- Coursera
- **UI/UX design**- Coursera
